STUDENT NAME: AMANDEEP	MODULE: My Practice	PRACTICE SET 001
BATCH: ABES_JAS26_FSD JAVA_IIIYear_Batch 02	DOMAIN: Gen AI & Prompt Engineering	STATUS: In Progress

Practice Set 1 – Creative Prompt Crafting

Master role-based prompt synthesis, evocative world-building, high-converting marketing campaigns, structured learning roadmaps, and iterative prompt enhancement using standard prompt engineering frameworks.

KEY LEARNING OBJECTIVES:

- Synthesize rich narrative personas and multi-sensory world-building constraints.
- Engineer multi-tiered marketing slogans with strict voice, tone, and character limits.
- Formulate adaptive 4-week full-stack study plans incorporating diagnostic checkpoints.
- Apply the CARE framework (Context, Action, Result, Example) to iteratively refine baseline prompts.

STEP-BY-STEP WORKSHEET INSTRUCTIONS:

Step 1: Deconstruct the prompt problem statement into target persona, core task directive, and stylistic constraints.
Step 2: Establish vivid context, emotional resonance, and negative constraints (what the AI must NOT do).
Step 3: Define explicit structural formatting (e.g., bulleted tiers, markdown tables, or narrative arcs).
Step 4: Write your engineered prompt in the designated workspace and verify against the review checklist.

EXERCISE 1.1: MULTI-PERSPECTIVE ATMOSPHERIC CREATIVE WRITING

Problem Statement: Instruct the AI to narrate a dramatic scene set during a violent oceanic storm at an isolated lighthouse. The scene must be told from two alternating psychological perspectives (a weathered lighthouse keeper vs a stranded shipwrecked sailor), evoking specific sensory details (smell of ozone, creaking rusted iron, deafening sea spray) while strictly avoiding cliché horror adjectives ('dark', 'terrifying', 'scary').

Baseline / Reference Prompt:
"Write a short story about an old lighthouse keeper in a storm who rescues a lost sailor. Make it atmospheric and intense."

STUDENT RESPONSE WORKSPACE:
[1] Role & Persona: _____
[2] Task & Directives: _____
[3] Constraints & Format: _____
[4] Complete Engineered Prompt:

EXERCISE 1.2: HIGH-IMPACT MARKETING SLOGAN & MULTI-TIER MESSAGING

Problem Statement: Engineer a prompt for 'EcoVolt Zero', an intelligent lithium-iron home battery system. The prompt must instruct the model to produce 3 slogan tiers: (A) Emotionally evocative (lifestyle & nature), (B) Cost-benefit analytical (energy bill reduction), and (C) Bold technical disruption (off-grid independence). Enforce a strict constraint of maximum 8 words per slogan and ban overused buzzwords ('revolutionary', 'game-changer', 'unprecedented').

Baseline / Reference Prompt:
"Give me 5 catchy slogans for a green battery company that saves money and helps the environment."

STUDENT RESPONSE WORKSPACE:
[1] Role & Persona: _____
[2] Task & Directives: _____
[3] Constraints & Format: _____
[4] Complete Engineered Prompt:

EXERCISE 1.3: ADAPTIVE 4-WEEK FULL-STACK STUDY PLAN GENERATION

Problem Statement: Design a prompt that generates a rigorous 4-week technical study roadmap for a 3rd-year CS student mastering Java Spring Boot and React. The prompt must require: (1) Daily 2-hour breakdown, (2) Weekly capstone project milestones, (3) Spaced repetition review intervals, and (4) Self-assessment quiz checkpoints formatted in a clean Markdown matrix.

Baseline / Reference Prompt:
"Create a study plan for learning Java, Spring Boot, and React in one month with practice tasks."

STUDENT RESPONSE WORKSPACE:
[1] Role & Persona: _____
[2] Task & Directives: _____
[3] Constraints & Format: _____
[4] Complete Engineered Prompt:

EXERCISE 1.4: PROMPT IMPROVEMENT & ITERATIVE POLISHING (THE CARE FRAMEWORK)

Problem Statement: Take a simplistic baseline prompt ('Explain microservices architecture simply') and upgrade it using the CARE framework (Context, Action, Result, Example). The prompt must target an audience of non-technical startup investors evaluating platform scalability, requiring a relatable airport/airline operations analogy and a pros/cons table.

Baseline / Reference Prompt:
"Explain microservices architecture simply so an executive understands it."

STUDENT RESPONSE WORKSPACE:
[1] Role & Persona: _____
[2] Task & Directives: _____
[3] Constraints & Format: _____
[4] Complete Engineered Prompt:

SELF-REVIEW CHECKLIST:

- [ ] **Persona & Perspective:** Role clearly defined with distinct voice, authority, and emotional depth.
- [ ] **Sensory Constraints:** Sensory anchors included; cliché adjectives restricted.
- [ ] **Negative Constraints:** Explicit exclusion list applied (banned buzzwords and repetitive tropes).
- [ ] **Format Precision:** Explicit formatting rules (Markdown, tabular tiers, character limits).
- [ ] **Practical Utility:** Output yields actionable, production-grade creative content.

CRITICAL REFLECTION & LEARNING SYNTHESIS:

- *How did applying negative constraints (e.g., banned words) force the AI to produce more original creative writing?*
- *In marketing and curriculum prompts, why is defining the target audience more effective than simply asking for 'good quality'?*

Reflection Notes:
_____
_____

COMPLETION STATUS:

[ ] COMPLETED (Meets All Rubric Criteria)
[ ] NEEDS REVISION (Resubmit Refined Prompts)

Evaluator Signature: _____

EVALUATOR & MENTOR REMARKS:

Feedback Notes:
_____
Rubric Evaluation: [ ] Clarity [ ] Constraints [ ] Edge Handling
